CSSE 220: Object-Oriented Software Development

Exam1

There are two parts to the in-class portion of the final exam. Both are in Gradescope:

Exam 1 - In-class Coding Dropbox ⌄

***

Exam 1 - Non-programming Part ⌄

Instructions for Part 1 (Non-programming)
1. Navigate to the course Gradescope page.
2. Open the assignment titled "Exam 1 – Non-programming Part".
3. Review the instructions at the start of the exam. Note the allowed/disallowed resources.
4. When you finish the non-programming part, review your work, then press the "Submit" button (it might also be labeled "Submit and View Submission").
5. One exam question asks you to complete a "Box and Pointer" diagram, which will be completed on paper and turned in when you have totally finished the exam.

Instructions for Part 2 (In-class Coding)
1. Navigate to the course Gradescope page.
2. Open the assignment titled "Exam1 – In-class Coding Dropbox".
3. Submit any file (e.g., an empty text file).
4. After 15-30 seconds, the autograder will provide a message with instructions for downloading the starter code zip file. ***If for some reason you cannot download the starter coder, please contact your instructor.***
5. Import the starter code zip file into Eclipse.
    a. Eclipse->File->Import->General->Existing Projects into Workspace
    b. Select archive file->Browse
    c. Find the starter code zip file
6. Review the instructions in "Exam1ComputerPart.docx", especially the list of allowed/disallowed resources.
7. When you finish, resubmit to Gradescope, including the following files:
    a. MapAnd2DArrayProblems.java
    b. SmallProblems.java
8. Wait for the autograder to finish running to make sure it finds the autograded files (a-b above).

If you have any clarifying questions or encounter any issues accessing/submitting the exam, please raise your hand.

You may use the reverse side of this sheet for scratch paper.
