CSSE 220: Object-Oriented Software Development

Final Exam

There are two parts to the in-class portion of the final exam. Both are in Gradescope:

Final Exam - Non-programming Part

Final Exam - In-class Coding

Instructions for Part 1 (Non-programming)

1. Navigate to the course Gradescope page.
2. Open the assignment titled "Final Exam – Non-programming Part".
3. Review the instructions at the start of the exam. Note the allowed/disallowed resources.
4. When you finish the non-programming part, review your work, then press the "Submit" button (it might also be labeled "Submit and View Submission").

Instructions for Part 2 (In-class Coding)

1. Navigate to the course Gradescope page.
2. Open the assignment titled "Final Exam – In-class Coding".
3. Submit any file (e.g., an empty text file).
4. After 15-30 seconds, the autograder will provide a message with instructions for downloading the starter code zip file.
5. Import the starter code zip file into Eclipse.
   a.
6. Review the instructions in "Final-instructions.docx", especially the list of allowed/disallowed resources.
7. When you finish, resubmit to Gradescope, including the following files:
   a. HashMapProblem.java
   b. RecursionProblem.java
   c. SinglyLinkedList.java
   d. ***ALL FILES*** in the `refactoring` package
8. Wait for the autograder to finish running to make sure it finds the autograded files (a-c above).

If you have any clarifying questions or encounter any issues accessing/submitting the exam, please raise your hand.

You may use the reverse side of this sheet for scratch paper.
